Brainstorm & Idea Prioritization Template

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

- **Collaborators:** Imran (Product/QA), Developer Team, Design Team.
- **Selected Problem Statement:**

"How might we create a seamless online marketplace for physical and digital books that connects customers directly with independent sellers while providing social elements like rating, progress tracking, and reviews?"

Step-2: Brainstorm, Idea Listing and Grouping

We brainstormed features and grouped them into the following clusters:

1. Core Bookstore Services (User Flow):

- Browse catalog by genre/author.
- Dynamic Search and Filter options (by genre, rating, price, author).
- Book Format Selector (Paperback, E-Book).
- Shopping Cart (add, edit quantity, remove).
- Secure Checkout (address input, order summary, confirmation).

1. Social & User Engagement (Interactions):

- Reading Progress Tracker (0% - 100% progress slide/indicator).
- Ratings and Written Reviews (user interactions per book).
- User Wishlist to save books for later.

1. Vendor Operations (Seller Flow):

- Seller signup/login.
- Seller dashboard to add, update, delete book listings, edit stock level, and choose formats.

- Order processing (change order status: Pending -> Shipped -> Delivered -> Cancelled).
- Seller Profile updates.

1. Administrative Vetting (Admin Flow):

- Admin dashboard to review and approve/reject sellers.
- Manage existing users, sellers, and books.
- Monitor platform orders and delete invalid entries.

Step-3: Idea Prioritization

Using the Impact vs. Feasibility matrix, we prioritized the brainstormed features:

• High Impact, High Feasibility (Must-Haves - Sprint 1 & 2):

- User/Seller Authentication (Form login/signup).
- Book Listing & Upload (with image uploads via Multer).
- Browse Book Catalog & Search.
- Cart & Checkout Form (basic order placement).
- Seller Book Inventory Management.

• High Impact, Medium/Low Feasibility (Should-Haves - Sprint 3 & 4):

- Reading Progress Tracker (0-100%) and Review Rating System.
- Admin vetting/approvals dashboard for sellers.
- Wishlist tracking per user.

• Low Impact, Low Feasibility (Nice-to-Haves / Backlog):

- Gmail & Facebook OAuth integration.
- Real-time shipping carrier API integration.
